Description The 24-piece RealTrax Graduated Trestle consists of 12 pairs of piers, pier bases and track holders - each different in height to create a 4.7% grade that rises to 6 1/2 inches above a crossing track section below. The 8-piece Elevated Trestle consists of 8 trestle piers of the same height, so that you can maintain the maximum height reached by the 24-piece system for a longer distance. Each RealTrax section simply slides into the track holder. No track mounting screws are necessary to attach track to the piers. Now you can safely add verticality to your RealTrax layout with stability, quality, and reliability. The RealTrax® Trestle System includes graduated and elevated trestles that are compatible with Lionel FastTrack. Almost all O-gauge model railroaders may enjoy the realism, flexibility and simplicity of its design.
